Low Range

LBS PER ACRE

LBS PER ACRE

# Instructions For Drill Calibration - Model 5605

1372 turns of drive wheel = 1 acre

137 turns of drive wheel = 1/10 acre

Step 1: Put plastic, or anything to collect seed, under drill

Step 2: Turn drive wheel 130 turns, which = 1/10 acre

This should give 1/10 of the LBS. per acre, you want to sow

EXAMPLE: If you want to sow 20 LBS per acre you should get 2 LBS of seed, per 130 turns of drive wheel  
or if you want to sow 35 LBS. per acre, you should get 3.5 LBS per 130 turns of drive wheel

\*Recommended Seeding Rate
